We aim to collaborate with overseas via the network of 4 prefectures in Shikoku.
We are ready to offer our "technical skills," "organizational power" and "mutual impact".

IT related companies in 4 prefectures of Shikoku established Shikoku regional IT network aiming contribution to stimulate local industries in Shikoku and are building a joint order system by gathering skills and utilizing networks of each other. Also the companies utilize and propose technologies around the world to companies in Shikoku.

We devote ourself to stimulating farming and locals.
Awaiting supervised tours of IT and farming. Let us help the arrangement.

We support building agriproducts branding of Shikoku and selling agriproducts worldwide, utilizing IT for farmers (such as dispatch of info and management of business, cultivation and facilities), and supplying agricultural materials and IT solutions to the world. We also look for agricultural materials, agriproducts and agricultural solutions, and facilities for farmers of Shikoku.
